## Relocation of IUPAC Secretariat

The International Union of Pure and Applied Chemistry IUPAC grew out of the international recognition of a need for standardisation in chemistry. It is accepted that standardisation of weights, measures, names and symbols is essential to the well-being and continued success of science as well as industry. Indeed it is essential for the smooth development and growth of international trade and commerce. It was this desire for international cooperation amongst chemists, and the wish to facilitate the work of the international, but fragmented, chemistry community that was one of the earliest characteristics of the Union.

At a meeting of the Executive Committee of IUPAP in Oxford, 20-21 April, 1996, the future location of the IUPAC Secretariat were carefully considered.

The Executive Committee decided to accept the proposal put forward by the US National Committee for IUPAC, and to move the Secretariat to Research Triangle Park, North Carolina, US, when the current Executive Secretary, Dr. Mo Williams, retires at the end of April 1997.
